I urge you a member of the board of directors of the FDIC to attend the hearing on Wal Mart starting a bank. Please listen carefully to the concerns of the witnesses.

Wal Mart could do to the local banks of communities the same thing they have done to other local businesses in our communities and that is to drive them out of business. Soon Wal Mart will have a monopoly on all of us.

Wal Mart undermines the economy of all of our United States. Their race is a race to the bottom instead of a race to improve our lives. They already have a proven track record of bending and breaking the laws for their own sake of the bottom line. They could even break the FDIC!

Please listen with the people of the United States in mind.
